

# W2ENY HiFi MIC ELEMENT

Custom Design replaces Heil's HC-4 or HC-5 element

This is an FET amplified electret element, you will have to mod your Heil adapter cable to pass DC to power the element.

Here is what you will need to do:

Icom - Remove series cap and solder direct

Yaesu – Add resistor from pin 2 to Pin 8, center conductor

Kenwood – Add resistor from pin 5 to Pin 1, center conductor

TenTec 4 pin -Add resistor from pin 4 to Pin 1, center conductor

TenTec 8 pin - Add resistor from pin 2 to Pin 8, center conductor
